PROFESSIONAL EXPERIENCE

Devops Engineer – chargoon Vanak , Tehran-Iran

3/2021-Present

- Implemented CI/CD by Jenkins and we **are 100% fully automated** releasing our software's and we **earned 40% saving time** to building pushed git repositories.
- Write bash script which automatically **back daily** all databases (Event-store, MongoDB) .
- implemented **fully observation** cycle by EFK (Logging),Jaeger(tracing) , Elasticsearch(indexing), Prometheus & Graphana(Monitoring & altering) and Kibana which enable us to track errors by high vision and accuracy
- **70% increased performance** by load testing JMeter and enabled read side MongoDB replica set
- Setup glusterfs cluster for saving stream data
- I share some of my experiences in **medium websites**. You can see them in bellow:
- [SCP files between two pods in Kubernetes | by Moinghorbani | Oct, 2022 | Medium](#)
